KARIN EKENBERG IT Security Engineer & Web Developer

SUMMARY

IT Security student with a background in Web Development (.NET/C#). I combine experience in application development with practical knowledge in digital forensics and network hardening to proactively identify and mitigate digital threats.

EDUCATION

Enköping Vocational College — *IT Security Engineer*

September 2025 - June 2027, Enköping

Focus: Ethical Hacking, Hardening (Win/Linux), IT Law (NIS2/GDPR), Network Engineering.

TUC Vocational College — *Web Developer*

August 2023 - April 2025, Jönköping/Remote

Specialization in C# and JavaScript.

EXPERIENCE

Joart, Remote - *Web Developer (Internship)*

November 2024 - April 2025

Developed a high-performance web platform focused on API integrations (Instagram/SVFF) in an agile Scrum environment. Worked with React and TypeScript, placing significant emphasis on secure API key management, thorough documentation, and disciplined remote work to meet strict delivery requirements.

WebIT Solutions, Avesta - *Web Developer (Internship)*

April 2024 - June 2024

Responsible for independent work on custom web solutions in WordPress, ranging from visual communication and Photoshop editing to technical delivery. The role

also included proactive maintenance through hardening and environment updates to minimize vulnerabilities in external interfaces.

SECURITY PROJECTS

Digital Forensics & Imaging: Securing digital evidence and creating bit-for-bit copies using tools such as **dd**, **Guymager**, and **FTK Imager**. Analysis of artifacts and file systems to map user activity with a focus on data integrity (hashing) and chain of custody.

Mobile & Cloud Forensics: Data acquisition from Android devices (artifact extraction) and log analysis via PowerShell (CLI) for forensic investigation of virtual disks in Azure.

Vulnerability Analysis & Pentesting: Execution of full "Kill Chains," from reconnaissance to privilege escalation in lab environments. Focused on technical documentation of vulnerabilities.

Network Security (Cisco): Configuration of ACLs, NAT, and network hardening to minimize attack surfaces in enterprise networks.

SKILLS & TECHNICAL COMPETENCIES

Security & Forensics: Management of chain of custody and data integrity with a focus on legal traceability. Experience in threat landscape analysis and current attack vectors (Fortinet certified).

Network & Architecture: Hardening of Windows/Linux environments and network architecture. Identity and Access Management (IAM).

Development & Automation: C#, .NET, JavaScript, React, and PowerShell. Experienced in automating and scripting solutions in both security and development contexts.

Compliance & Documentation: Solid understanding of NIS2/GDPR. Methodical technical documentation in Swedish and English with a focus on traceability and audit trails.

CERTIFICATIONS

Fortinet Certified Fundamentals in Cybersecurity (2025 – 2027)

Introduction to the Threat Landscape 3.0, Fortinet (2025)

Generative AI Learning Path, Google Cloud/Coursera (2024)

ABOUT ME

In my spare time, I recharge in the forest, whether through running or picking mushrooms and berries. I also enjoy dancing and fitness. For me, healthy habits and a balanced lifestyle are the foundation for performing at my peak and maintaining a sharp focus in my professional work.
