- Swedish
- English

CERTIFICATIONS

- Fortinet: Certified Fundamentals (2025)
- Fortinet: Threat Landscape 3.0 (2025)
- Google: Generative AI Learning Path (2024)

SUMMARY

IT Security student with a background in web development (.NET/C#). Combines experience in application development with practical knowledge in digital forensics and network hardening to proactively identify and counteract digital threats.

EXPERIENCE

Joart

2024-2025

Web Developer (internship)

Developed a high-performance web platform focusing on API integrations (Instagram/SVFF) within an agile Scrum environment. Worked with React and TypeScript, placing a strong emphasis on secure handling of API keys, meticulous documentation, and disciplined remote work to meet strict delivery requirements.

WebIT Solutions

2024-2024

Web Developer (internship)

Responsible for independent work on customized web solutions in WordPress, from visual communication and Photoshop editing to technical delivery. Included proactive maintenance through hardening and updating environments to minimize vulnerabilities in external interfaces.

TECHNICAL SECURITY PROJECTS & LABS

- **Incident Response & Malware:** Analyzed network traffic and artifacts from infected systems (e.g., Hancitor malware) to identify C2 communication and exfiltration patterns.
- **Mobile & Cloud Forensics:** Practical experience in data extraction from Android devices, as well as log analysis and forensic investigation in Azure environments via CLI/PowerShell.
- **Evidence Handling:** Established forensic workstations and secured disk images with FTK Imager and Guymager, with a strict focus on integrity verification (hashing) and chain of custody.
